

10 Signs of a Noble City

Do you desire to see your city become a “noble” city? What does that mean? Kris Vallotton taught on this topic from which I created these declarations.

- 1- The city is safe. You are not worried that your children will be harmed or your home broken into. If someone commits a crime they are brought to justice swiftly.
- 2- The city is prosperous; industry is thriving and there are plenty of good paying jobs for everyone who wants to work. Therefore unemployment is low and there is enough tax money to pay for all the necessary services. Overtaxing & abuse is stopped.
- 3-The educational institutions are excellent. They are training and equipping students in both life skills and occupational opportunities.
- 4-There is a positive spiritual climate in the community led by many healthy churches.
- 5-The morale of the city is great. People have a positive out look on life and they are basically happy.
- 6-The medical community is well equipped and staffed to help bring physical wholeness to people.
- 7-There is healthy recreation and entertainment in the community.
- 8-The government of the city is honest, forward thinking, and wise.

9-The poor and homeless are well taken care of, but not empowered to remain homeless.

10-The city has a noble identity and purpose.

Now go back and reread each one of those statements as a declaration over your city/state.
